CIE DIVISIONAL MEETING
VIENNA, AUSTRIA

5 – 8 September 2010

Our hosts are the CIE-Central Bureau and the Austrian National Committee of CIE.

For those arriving for the weekend there will be a TC 4.11(social) meeting on the Sunday which is likely to involve a boat trip down the Danube and a good lunch somewhere.

With regard to technical matters, these will start on the Monday and we have at present 8 TC’s meeting plus one pre-meeting (see following pages) and it would be helpful if you would contact the TC Chair to confirm which meetings you will be able to attend and whether you would like copies of the latest drafts to comment on.
Joint activities are as follows:

Monday 6 September part morning - D 4 & 5 pre meeting

Wednesday 8 September Morning - Divisional Meeting

- TC and Meeting Schedule – Monday - Wednesday 6- 8 September 2010

TC 5.18 Practical design guidelines for the lighting of exterior work areas

Chairman: Peter Strasser (US) TUESDAY PM

TC 5-28 Guide on Limiting Obtrusive Light (Review of Doc. 150)
Chairman: Nigel Pollard (UK) MONDAY PM
• From the Director

As you will know, at the Quadrennial Meeting next year in South Africa I will have to step down as your Director after a very enjoyable two terms. While we have not made quite the progress I hoped for originally, we have moved forward, although the ideas for a joint “Applications” Division with either Division 4, or 3 & 4, are still with us.

Meanwhile, I am delighted to report that Peter Schwarcz known to you all I am sure, has offered himself as your new Director for the next Quadrennial Term. As before, the CIE Board would like a democratic vote on such an important issue and if anyone else would like to stand against Peter please let me know, or if not please send your confirmation of Peter as our choice of Director for 2011- 2013 by the end of June’10.

Unfortunately, there have been some delays in setting up the Internet tool (Colltool) that will allow all TC’s to work more efficiently but this should be up and running within the next few months and should help speed up TC work between our annual meetings.

Meanwhile, we have been asked to find a volunteer for a reporter to investigate forming an interdivisional TC for implementation of the results of Ken Sagawa’s report on the visual requirements for the Elderly – please contact me if you would like to help.

• News on TCs.
