CIE Tutorial and Expert Symposium on Measurement Uncertainties in Photometry and Radiometry for Industry!

September 11 and 12, 2014, Vienna, Austria.

CIE Division 2 is pleased to offer you the opportunity to get acquainted with Measurement Uncertainties in Photometry and Radiometry. There will be an emphasis on its practical implementation, including an introduction to Monte Carlo simulations for photometry. On the first day of the two day event, the programme will include lectures by the world’s leading experts in photometry and radiometry, as well as providing opportunity to exchange and discuss the latest experimental studies and other associated research.

Topics will include measurement uncertainties relating to:

- luminous intensity distributions and derived quantities such as luminous flux;
- electrical parameters of SSL devices;
- spectral measurements and derived quantities such as chromaticity;
- conformity assessment and global risk assessments.

On the second day a scientific symposium will feature contributed papers on these and associated topics.

For the announcement and call for papers please click here. The final programme with confirmed speakers will be available at end of June 2014.

The venue will be the University of Vienna, Oskar-Morgenstern-Platz 1, 1090 Vienna/AT. The registration link will be posted on the event website on Friday, June 6, 2014. Your registration will be approved as soon as payment has been confirmed.
