

International Commission on Illumination  
Commission Internationale de l'Éclairage  
Internationale Beleuchtungskommission

Dear Colleagues,

It is our pleasure to invite you to be part of the CIE 30th Quadrennial Session, which will be hosted by the CIE National Committee of Slovenia and held in the city of Ljubljana, Slovenia.

The CIE Quadrennial Session includes the conference CIE 2023, which runs from September 18 to 20, 2023. This three day conference brings together the CIE community and its stakeholders together to advance the science of light and lighting and the technical and organizational work of the CIE.

With strong technical and scientific foundations, the CIE is an independent, non-profit organization that serves its member countries and the global community. Originally formed in 1900 as the International Commission on Photometry (CIP), and restructured as the CIE in 1913, the Commission is globally accepted as representing the best authority on all aspects of light and lighting. The CIE is recognized by the International Commission for Weights and Measures (CIPM), the International Standardization Organization (ISO) and the International Electrotechnical Commission (IEC) as an international standardization body.

The theme of CIE 2023 is “**Innovative Lighting Technologies**” and we especially invite abstract submissions on:

- Horticulture
- Urban lighting
- Use of daylight
- Improved well-being at all stages in life
- Optimization of image reproduction, printed and virtual
- Energy efficiency

Of course, we also invite submission on topics related to all of the CIE Divisions: Vision and Colour; Physical Measurement of Light and Radiation; Interior Environment and Lighting Design; Transportation and Exterior Applications; Photobiology and Photochemistry; and, Image Technology.

This conference presents the perfect opportunity for all interested in the arts and sciences of light and lighting, from science, engineering, design and industry, to come together to discuss their interests with like-minded professionals from the global lighting community.

Our host city, Ljubljana, the capital of Slovenia, is a dynamic Central European city lying in a broad basin between the Alps and the Adriatic Sea. Although Ljubljana is one of the youngest capitals in the European Union, it nevertheless reveals a long history and a real wealth of cultural and artistic monuments.

We look forward to welcoming you to Slovenia and seeing you at the CIE 30th Quadrennial Session.
